

## DELIVER BILLING WITH CLEAR INSIGHTS

Rev.io's sophisticated billing and customer management platform gives you the tools to efficiently grow and scale your business while delivering actionable business intelligence. Complementing this platform is **Rev.io Sync**, part of our suite of integrated solutions.

**Rev.io Sync** is a data reconciliation tool that improves billing accuracy and revenue assurance by comparing data provisioned in your switch with the data stored in your billing system. Using **Rev.io Sync**, clients can reconcile information easily and clearly to create even more accurate billing.

The platform currently supports the Cisco BroadWorks®, Netsapiens®, and MetaSwitch® product suites, ensuring seamless integrations with a variety of platforms.

## **REV.IO SYNC HELPS YOU:**

- Match billing to provisioned services
- Ensure billing accuracy
- Save time & reduce human error
- Avoid revenue leakage

## Key Rev.io Sync features that complement your billing engine include:

- Bulk syncing of services and fields on services
- Smart recommendations of potential matches to existing Rev.io Services
- Option to create new customers, products, and services from source details
